NO

achieve the life goal

number that represents the golfer's ability based on their previous golf round's scores

The average handicap in the USGA system is found to be a score of 90. 90 are what bogey players score. A bogey player is one who scores one above the par. This will produce an average score of 90. Most of the people in the US can shoot more than 100. There have been no other attempts made to find the national average score of the golfers.
